

I-Work EVO

 *Studio Office*

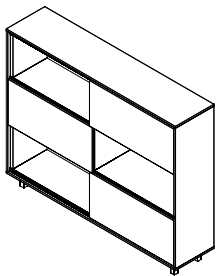

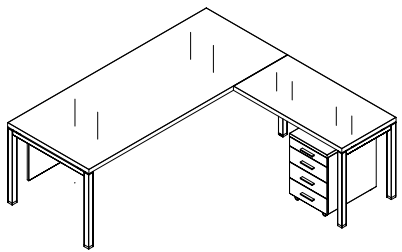

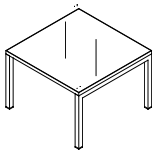

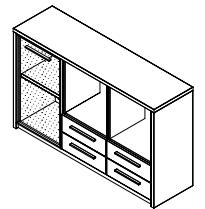

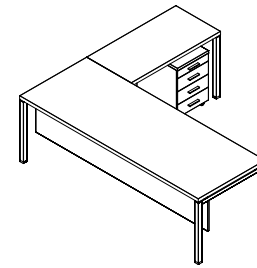

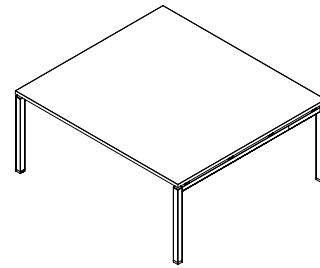

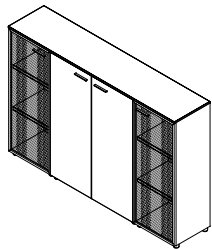

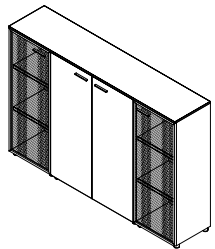

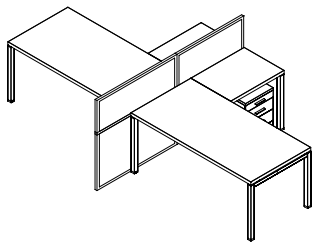

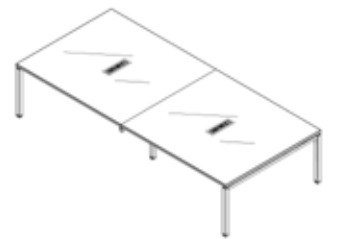

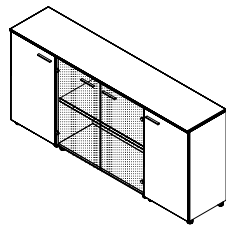

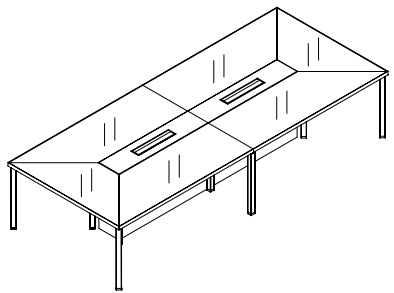

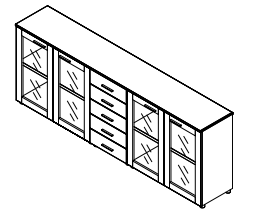

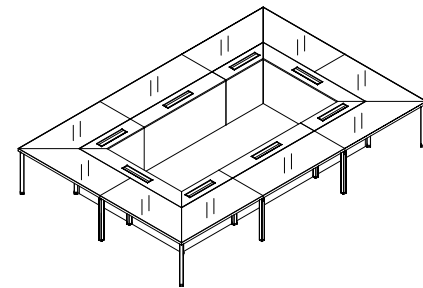

DESK LEG

Metal frame support on 4 legs. Made of tubular metal profiles of square cross-sectional in chrome finish. They are pre-fitted on the upper transversal part for the attachment of the horizontal supporting beams. Foot is fitted with leveling feet for possible floor level abnormalities. The structure can also accommodate CPU holder and/or the front modesty panel. Available in two versions to be used for tops of 80 and 60 cm in depth. Supplied knock-down, packed in triple-layer cardboard and complete with screws for fixing to the tops.

HORIZONTAL SUPPORT BEAM

They come in pairs for each individual desk top and they are made of rectangular-sectioned extendable tubular steel. At the ends, they are equipped with printed steel plates for the connection to the upper transversal rod of the legs and for mounting the workstation tops. They are supplied complete with ABS carters that serve to conceal the leg/beam coupling screws. Optional cable tray is available being supported on the support beams, or under the desk top.

DESKTOPS and EXTENSIONS

It comes in two types of desktops. Wooden tops and glass tops.

Wooden tops are made of 30mm-thick melamine faced chipboard and edged with polished aluminum profile. Glass tops are made of 10mm-thick frameless glass in frosted or in coloured finish and alternatively in 36mm-thick finished edge, with perimetrical polished aluminum profile.

MODESTY PANELS FOR DESKS

Available in wood or in metal. The wooden one is made of 18 mm thick melamine-faced chipboard in matching or different colour with the desk top, with perimetrical PVC edging.

The metal one is available in perforated or solid form. Both types of the modesty panels are fitted to the desk through special brackets.

KD FITTINGS

All connections are carried through a 4-part metal KD fitting. Metal inserts are permanently inserted in the core of the particleboard enabling easier and unlimited disassembly and re-assembly.
